## Top Skills

C (Programming Language)  
XML  
Java

## Languages

English (Full Professional)  
Tamil (Native or Bilingual)

## Certifications

Cambridge Business English  
Assessment  
Product Management: Customer  
Development  
Become a Product Manager  
Becoming an AI-First Product Leader  
Rest API (Intermediate) Certificate

## Honors-Awards

Finalist in National level Mobile  
Robotics Competition  
Core Member in Research and  
Incubation Cell  
Programming Head of SKCET  
ROBOCON Team

# Prakash Sellathurai

Software Engineer , Ex-Amazon  
Chennai, Tamil Nadu, India

## Summary

I'm a Software Engineer with 3 years building scalable backend systems and ML-driven features at Amazon (Alexa Communications), specializing in computer vision, Python, C++, distributed services, and performance optimization. From Mechatronics engineering roots, I deliver secure, low-latency pipelines that boost reliability, security, and user retention—reducing Alexa churn by 10% via incoming call blocking and cutting image-processing latency 60% with C++ edge detectors at Bigthinx. Key AchievementsEngineered malware-scanning pipeline for Alexa LLM architecture, enhancing security for high-throughput services.Shipped keras.utils.split\_dataset to Keras open-source (thousands of users) and maintain GitHub projects in automation, CLI tooling, and ML workflows.Expert in coding, testing, code reviews, microservices, AWS, and software best practices—bridging hardware intuition with production-grade software.What I Bring to TeamsBackend/ML Engineer passionate about system design, observability, and fault-tolerant architectures. Hold BE in Mechatronics (Robotics & Automation) from Sri Krishna College of Engineering and Technology. Open to connecting on software engineering roles at innovative companies—let's chat about distributed systems or open-source contributions!

## Experience

Amazon  
Software Development Engineer  
August 2022 - November 2024 (2 years 4 months)  
Chennai, Tamil Nadu, India

Spearheaded the development and delivery of key features for Alexa Communications, resulting in improved security and user experience.

- Led the implementation of the Incoming Call Blocking feature, reducing monthly user churn by 10%.

- Designed and Implemented a Malware Scanner for enhanced security within the Alexa LLM architecture.
- Launched an experimental primer page to optimize device setup flows through user acceptance A/B testing.

## Bigthinx

### Computer Vision Engineer

May 2019 - January 2020 (9 months)

bangalore

- Developed AI for Bigthinx products using Computer Vision, Machine Learning, and OpenCV.
- Reduced Image Processing server latency by 60% through process-based parallelism.
- Implemented ML detectors in C++ for edge devices and GPU-accelerated Docker images for cost reduction.
- Researched and prototyped object detection and recognition techniques.

---

## Education

### Sri Krishna College of Engineering and Technology

Bachelor of Engineering, Mechatronics, Robotics, and Automation

Engineering · (August 2015 - March 2019)
